Education

May 2001 — Ph.D., Computer Science, **University of Illinois at Urbana-Champaign**.
Dissertation: "Modular Compilers and Their Correctness Proofs."
Committee Chairman: Samuel Kamin

June 1992 — M.S., Computer Science, **University of California, Davis**.
Thesis: "Mechanizing the Axiomatic Semantics for a Programming
Language with Asynchronous Send and Receive in HOL."
Thesis Advisor: Karl Levitt

June 1986 — B.A., Mathematics, **University of California, Berkeley**.

Academic & Professional Appointments

Aug 2017–Present	**Senior Research Scientist**, Oak Ridge National Laboratory, Cyber & Information Security Research Group (CISR)
Sep 2003–Jul 2019	**Associate Professor**, Department of Computer Science, University of Missouri at Columbia. Promotion and tenure 5/26/2009
Aug 2013–Jul 2014	**Visiting Scientist**, National Security Agency
Apr 2011–present	**Director**, The Center for High Assurance Computing at the University of Missouri
Sep 2010–Aug 2013	**Research Consultant**, Pro-telligent, Inc. Arlington, VA
Jun 2000–Aug 2003	**Senior Research Associate & Adjunct Professor**, Computer Science Dept., Oregon Graduate Institute, Beaverton OR
Sep 2000–Dec 2000	**Senior Compiler Engineer (consultant)**, Reservoir Laboratories, Portland, Oregon.
Aug 1999–May 2000	**Visiting Lecturer**, Department of Computer Science, Indiana University, Bloomington, IN 47401.
Spring 1999	**Visiting Lecturer**, Department of Computer Science, University of Illinois at Urbana-Champaign, Urbana, IL.

Research Interests

Reconfigurable computing and high-level synthesis; Hardware and Embedded system security; Computer security and language-based methods in security; Trustworthy computing; Formal methods (particularly with respect to hardware/software codesign); Programming language design and implementation.

Personal Information

I am a US citizen.

I am married to Amber Bradshaw, who is a ceramic artist.

We have two children: Tegan and Caden (twins, 9 years old).

Funding History

Proposals Under Submission

Agency: Office of Naval Research.
Title: High Assurance FPGA Design.
Proposed Budget: $2,980,000.
Role: Collaborative research proposal with Dr. Gerard Allwein (US Naval Research Laboratory) and Professor Jason Bakos (University of South Carolina, Computer Science & Engineering).

Active Grants and Contracts

1. **Agency:** US Naval Research Laboratory.
   Title: Mechanizing the Metatheory of the ReWire Language with Applications.
   Amount: $720,000.
   Period: May 2016 – August 2019.
   Role: Sole Principal investigator.

2. **Agency:** US Naval Research Laboratory.
   Title: Integrated Formal Methods for Secure FPGA Development.
   Amount: $300,000.
   Period: January 2019 – December 2021.
   Role: Sole Principal investigator.

Completed Grants and Contracts

1. **Agency:** US Naval Research Laboratory.
   Title: Type-Based Analysis of Security Flows in ReWire Circuit Specifications.
   Amount: $99,999.
   Period: October 2014 – October 2015.
   Role: Sole Principal investigator.

2. **Agency:** National Security Agency.
   Title: Inter-agency Personnel Agreement.
   Amount: $144,190.00
   Period: August 2013 – August 2014.

3. **Agency:** Department of Defense, Federal Voting Assistance Program (FVAP).
   Title: Secure Ballot Delivery to UOCAVA Voters (Uniformed, Overseas, Citizens Absentee Voters).
   Amount: $550,000.
   Period: May 1, 2012 – April 30, 2015.
   Role: Collaborative research with Dr. Dale Musser of MU's Information Technology Program and Dr. Keith Politte of MU's Reynolds School of Journalism.

4. **Agency:** Department of Education.
   Title: Graduate Assistance in Areas of National Need (GAANN) Fellowships.
   Amount: $240,000.
   Period: September 1, 2011 – May 15, 2015.
   Role: Co-Investigator. Two of my Ph.D students (Adam Procter and Christopher Hathhorn) were GAANN fellows.

5. **Agency:** National Science Foundation.
   Title: CAREER: Automated Synthesis of High Assurance Security Kernels.
   Amount: $450,000.
   Period: June 1, 2008 – May 31, 2013.
   Role: Sole Principal Investigator.

6. **Agency:** Office of the Asst. Secretary of Defense for Research and Development (ASD(R&E)).
   Title: Understanding Security Flows in the Many Core Era.
   Amount: $1,370,000.
   Period: January 2012 – July 2015.
   Role: Principal Investigator. Collaborative Research with Dr. David Andrews (University of Arkansas) and Dr. Gerard Allwein (NRL).

7. **Agency:** US Naval Research Laboratory.
   Title: MILS Hardware and Its Formal Methods-based Security.
   Amount: $810,000.
   Period: April 2008 – April 2011.
   Role: Principal Investigator. Collaborative Research with Dr. David Andrews (University of Arkansas) and Dr. Gerard Allwein (NRL).

8. **Agency:** Department of Defense through OHSU/OGI.
   Title: System Information Assurance II
   Amount: $31,703
   Period: July 1, 2004 – July 31, 2006
   Role: Principal Investigator

9. **Agency:** University of Missouri-Columbia Research Council.
   Title: Big Twelve Faculty Fellowship
   Amount: $2,400
   Period: June 1, 2005 – August 31, 2005
   Role: Sole Principal Investigator

Selected Honors, Memberships, and Service

Program Committee member, 13th International Conference on Mathematics of Program Construction (MPC), 2019.

Program Committee member, 2018 International Conference on Reconfigurable Computing and FPGAs (ReConFig), 2018.

Program Committee member, 30th International Conference on Computer Aided Verification (CAV), 2018.

Selected for Intel Corporation's 2017 Hardware Accelerator Research Program.

Program Chair for Seventh Workshop on Design, Modeling and Evaluation of Cyber Physical Systems (CyPhy'17).

Organized special session entitled *The Confluence of Secure Hardware and Programming Languages* for the International Conference on Engineering of Reconfigurable Systems and Algorithms (ERSA 11).

Recipient, National Science Foundation CAREER award (CyberTrust program) in 2008.

Received *Certificate of Appreciation* from the University of Missouri College of Engineering Graduating Seniors on December 11, 2009 for teaching excellence.

Member of ACM and IEEE.

Lead successful effort to earn the University of Missouri accreditation as a National Security Agency Center of Academic Excellence in 2007.

Invited participant to the NSF High-Confidence Software Platforms for Cyber-Physical Systems (HCSP-CPS) Workshop, November 30-December 1, 2006 in Alexandria, Virginia.

Summer Faculty Fellow to the 2006 Office of Naval Research/ASEE Summer Faculty Research Program. Research performed in the Software Engineering Section of the Naval Research Laboratory's Center for High Assurance Computer Systems in Washington, DC.

Member of the program committees for the *Colloquium for Information Systems Security Education* (CISSE 2011, 2012), *ACM Symposium on the Implementation of Functional Languages* (IFL11), *ACM SIGPLAN 2008 Haskell Symposium* (Haskell08), the *7th International Conference on the Mathematics of Program Construction* (MPC06).

Reviewer for the *Journal of Computer Security* (JCS), the *Journal of Functional Programming* (JFP), the *ACM Transactions on Programming Languages and Systems* (TOPLAS), the *Theoretical Computer Science* (TCS), the *Journal of Software Testing, Verification and Reliability*, the *ACM Journal of Experimental Algorithmics* (JEA), and the *American Medical Informatics Association Symposium 2005* (AMIA 2005).

Received *Big Twelve Faculty Fellowship*, University of Missouri, Columbia; visited University of Kansas System Level Design (SLDG) and Hybrid Threads groups.

University of Missouri nominee for 2005 *Microsoft New Faculty Fellowship* for Bioinformatics research.

Frequent invitations to serve and participation (usually once or twice per year) on National Science Foundation review panels.

Chaired recruiting committee that ultimately resulted in the hiring of Drs. Rohit Chadha and Prasad Calyam in the MU Computer Science department.

Currently chairing recruiting committee for the area of "High Assurance Cyber Physical Systems" in the MU Computer Science department. Expect to hire 5 faculty.

Invited Talks and Conference Presentations

Semantics-directed Prototyping of Hardware Runtime Monitors. The 29th International Symposium on Rapid System Prototyping (RSP), October 2018.

Why Functional Hardware Description Matters. Oak Ridge National Laboratory, Oak Ridge TN, 3/13/2017.

Model-driven Design & Synthesis of the SHA-256 Cryptographic Hash Function in ReWire. The 27th International Symposium on Rapid System Prototyping (RSP), 2016.

A Programming Model for Reconfigurable Computing Based in Functional Concurrency. The 11th International Symposium on Reconfigurable Communication-centric Systems-on-Chip (ReCoSoC 2016).

Provably Correct Development of reconfigurable hardware designs via equational reasoning. The 2015 International Conference on Field-Programmable Technology (FPT ?15).

High Assurance Hardware with ReWire: Just Say No! to Semantic Archaeology. The Technical Cooperation Program (TTCP) workshop, Defence Science & Technology Organization (DSTO), Adelaide Australia, 5/18/2015.

High Assurance Hardware with ReWire: Just Say No! to Semantic Archaeology. High Confidence Software and Systems (HCSS) NSA workshop, Annapolis MD, 5/6/2015.

High Assurance Hardware with ReWire: Just Say No! to Semantic Archaeology. Oak Ridge National Laboratory, Oak Ridge TN, 3/3/2015.

The Confinement Problem in the Presence of Faults. Proceedings of the 2012 International Conference on Formal Engineering Methods.

Towards semantics-directed system design and synthesis. International Conference on Engineering Reconfigurable Systems and Algorithms (ERSA), 7/19/2011.

Understanding Security Flows in the Many Core Era. National Security Agency, Information Assurance Directorate, 10/14/2010, Sponsor: Brad Martin.

An Academic Response to National Science and Technology Challenges. Department of Defense Intelligence Information Systems (DoDIIS) Worldwide Conference, 5/26/2010.

Model-driven Synthesis of High Assurance Secure Systems. University of Iowa, 10/23/09, Sponsor: Professor Aaron Stump.

Model-driven Synthesis of High Assurance Secure Systems. Galois, Inc., 5/20/08, Sponsor: John Launchbury.

Compiling for Security. Missouri Institute of Technology (formerly University of Missouri, Rolla), 4/28/08, Sponsor: Professor Bruce McMillen.

Proof Abstraction for Imperative Languages. The 4th Asian Symposium on Programming Languages and Systems (APLAS06), Sydney, Australia, 11/8/2006.

The Essence of Multitasking. The 11th International Conference on Algebraic Methodology and Software Technology (AMAST06), Kuuresaare, Estonia, 7/5/06.

Domain-specific Languages for Cellular Interactions. University of Kansas, 4/29/05, Sponsor: Professor Perry Alexander.

A Simple Semantics for Polymorphic Recursion., Proceedings of the 3rd Asian Symposium on Programming Languages and Systems (APLAS05), Tsukuba, Japan, 11/3/2005.

Achieving Information Flow Security Through Precise Control of Effects. The 18th IEEE Computer Security Foundations Workshop (CSFW05), Aix-en-Provence, France, 7/20/05.

Information-flow Security & Monadic Effects. University of Illinois at Urbana-Champaign, 4/18/2005, Sponsor: Professor José Meseguer.

Domain-specific Languages for Cellular Interactions. The 26th Annual IEEE International Conference on Engineering in Medicine and Biology, San Francisco, California, 9/3/04.

Domain-specific Languages for Biology. Georgia State University, 5/26/2004, Sponsor: Professor Yi Pan.

Domain Separation by Construction. LICS03 Satellite Workshop on Foundations of Computer Security (FCS03), Ottawa, Canada, 6/26/03.

Prospects for Modular Compilation. Rice University, 12/11/2002, Sponsor: Professor Walid Taha.

Domain-specific Languages for Compilation. University of Alabama, 11/22/2002, Sponsor: Professor Joel Jones.

Pattern-driven Reduction in Haskell. Second International Workshop on Reduction Strategies in Rewriting and Programming, Copenhagen, Denmark, 7/21/02.

Fine Control of Demand in Haskell. The Sixth International Conference on the Mathematics of Program Construction (MPC02), Dagstuhl, Germany, 7/8/02.

Dynamically Adaptable Software with Metacomputations in a Staged Language. The Second Workshop on the Semantics, Applications and Implementation of Program Generation (SAIG01), Florence, Italy, 9/6/01.

Metacomputation-based Compiler Architecture. The Fifth International Conference on the Mathematics of Program Construction (MPC00), Ponte de Lima, Portugal. 7/5/00.

Modular Compilers Based on Monad Transformers. The IEEE International Conference on Computer Languages (ICCL98), Chicago, Illinois. 5/16/98.

Students & Postdocs Supervised

Postdoctoral Researchers Supervised

1. Adam Procter. 1/2015-5/2016.

2. Soumya Sanyal. 9/2013-9/2015.

Graduated Ph.D Students

1. Adam Procter. GAANN fellow. Graduated: 12/2014.
   Dissertation: *Semantics-directed Design and Implementation of High Assurance Hardware.*

2. Ian Graves. Graduated: 12/2015.
   Dissertation: *Device-level Composition in ReWire.*

3. Christopher Hathhorn. GAANN Fellow. Graduated: 12/2017.
   Dissertation: *Defining the Undefinedness of C11: Practical Semantics-based Program Analysis.*

Current Ph.D Students

1. Thomas Reynolds. Started Fall semester 2014.

2. Qianli Zhang. Started Fall semester 2016.

3. Trevor Bajkowski. Started Fall semester 2018.

4. Matthew Deardorff. Started Fall semester 2018.

Graduated MS Students

1. Daniel Dunn. Thesis: Penetration Testing FOSCAM IP Cameras. Graduated: 5/2018.

2. Zolbayar Magsar. Graduated: 5/2016.

3. Richard Wallen. Graduated: 12/2015.

4. Mohammed Alharbi. Graduated: 5/2013.

5. Jared Kvanvig. Thesis: Compiler Infrastructure for the Cheap Threads Compiler. Graduated: 12/2009.

6. Ajay Nagar. Non-thesis. Graduated: 5/2009.

7. Megha Rao. Thesis: Physical Security in a Nuclear Environment. Graduated: 12/2008.

8. Pericles S. Kariotis. Thesis: Making Monads First-class Using Template Haskell. Graduated: 12/2008.
